

THE ROBOTIC GAMES FOR EVERYONE

“

Fostering Knowledge with Science, Technology, and Education through WRG® Robot Games

พัฒนาและสร้างเสริมความรู้ด้วยวิทยาศาสตร์ เทคโนโลยี และการศึกษาผ่านเกมหุ่นยนต์ ”

WRG® Robot Games

Our Mission

“**Our** mission is to help young people develop their creativity and problem-solving skills in a fun and engaging way. We do this by organizing robotics competitions in six different robotics games for students aged 8-19 years.

World Robot Games® Association is an independent non-profit organization. All revenue from sponsorships and fees is invested in support of our mission, which is to promote robotics in STEM education worldwide.”

ภารกิจหลักของเราคือการช่วยให้เยาวชน สามารถพัฒนาความคิดสร้างสรรค์และทักษะการแก้ปัญหา
ด้ผ่านหุ่นยนต์ Robot ผ่านการแข่งขันหุ่นยนต์ในเกมหุ่นยนต์ ซึ่งประกอบด้วย 6 ประเภทเกมที่เหมาะ
สำหรับนักเรียนอายุ 8-19 ปี และผู้ที่สนใจใน หุ่นยนต์แข่งขัน

World Robot Games® Association เราเป็นองค์กรอิสระที่ไม่
แสวงหาผลกำไร รายได้ทั้งหมดจากการสนับสนุนและ
ค่าธรรมเนียมนำไปลงทุนเพื่อสนับสนุนภารกิจของเรา ซึ่งก็คือ
การส่งเสริมวิทยาการหุ่นยนต์ในการศึกษา STEM ทั่วโลก

FOR SUSTAINABLE DEVELOPMENT GOALS

Robotics for Sustainable Development Goals

Robotics is revolutionizing our approach to achieving Sustainable Development Goals (SDGs) by offering innovative solutions that are both efficient and sustainable. With their ability to automate tasks, collect data, and operate in challenging environments, robots are becoming valuable allies in our quest for a more sustainable future.

In agriculture, robots equipped with sensors and artificial intelligence are enhancing crop management, reducing waste, and promoting sustainable farming practices, thereby aligning with SDG 2 (Zero Hunger) and SDG 15 (Life on Land). These technologies are increasing food production while minimizing environmental impact.

In the realm of clean energy, robots are optimizing the production and maintenance of renewable energy sources, contributing to SDG 7 (Affordable and Clean Energy). They can perform routine inspections of solar panels or wind turbines, ensuring optimal efficiency and prolonging their lifespan.

In healthcare, robotic surgical systems are improving precision and reducing the invasiveness of procedures, thus advancing SDG 3 (Good Health and Well-being). Telemedicine robots are also expanding access to medical services in remote areas, promoting equitable healthcare access.
